## TRADITIONAL LOG BARNS

### SPECIFICATIONS:

- Traditional Log
- 5184 Square Feet
- 36' deep x 72' long
- 1 3/4 Story
- Eastern White Pine Timbers

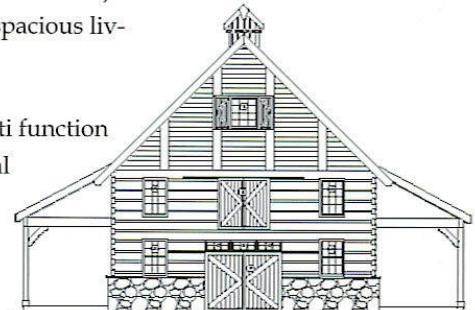

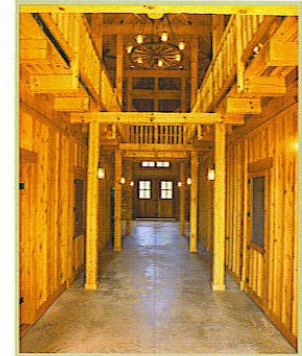

**TRADITIONAL LOG BARNs** pay homage to a great American tradition. This gorgeous Alabama barn was designed to house humans, horses and the occasional social gathering. This beautiful, yet functional, structure is made of Hearthstone's traditional 6 x 12 log system. This particular system is made of hand-hewn, Eastern White Pine square logs, with a 4 inch chink space, half dove tail corners, and a heavy timber roof system.

The first floor of the barn has 4 horse stalls, a combination tack room/workshop, a kitchen, half bath and a large storage area. Two large covered porches with 6 x 12 rafters and 8 x 8 hewn posts, stretch the length of the barn on each side. This area is used for outdoor entertaining.

The second story of the barn has hay storage and drop, in addition to a large living quarters. This area is comprised of a bedroom, full bath, walk-in closet, kitchen, laundry and a spacious living area.

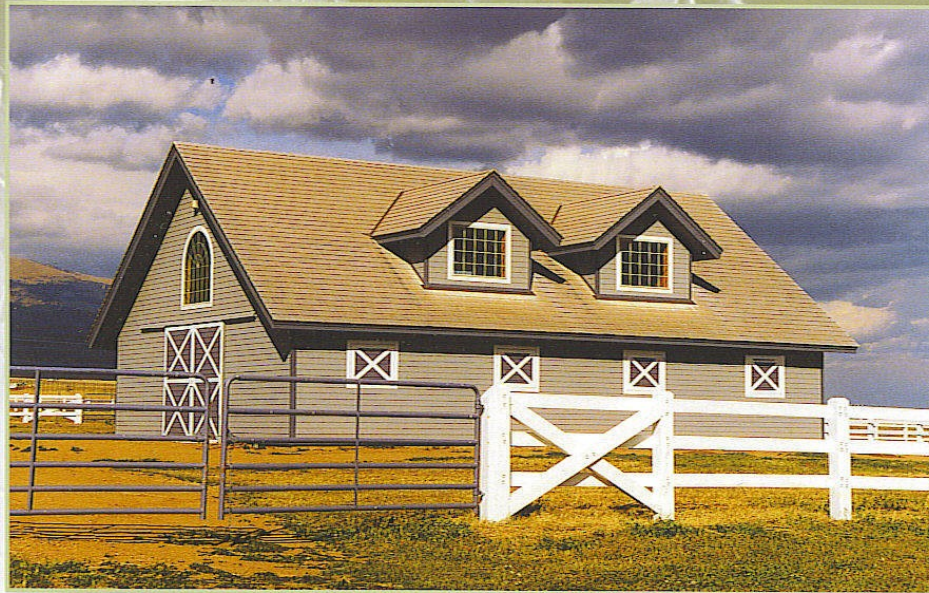

For those seeking a multi function barn, made of traditional materials, this structure is hard to surpass.

## TIMBER FRAME BARNs

### SPECIFICATIONS:

- Timber Frame
- 1728 Square Feet
- 36' deep x 48' long
- 1 Story
- White Pine Timbers

**THE TRADITION OF TIMBER FRAME BARNs** goes back for centuries. As evident in this Colorado horse barn and Ohio residential barn, flexibility of design, appearance and function are key to the popularity of timber frame barns. Virtually any common material can be used on the exterior. Though many wood species can be utilized for the structural frame, Eastern White Pine and Oak are two of the most common.

### SPECIFICATIONS:

- Timber Frame
- 3202 Square Feet
- 35' deep x 61' long
- 1 1/2 Story
